Once the Model Document is created, the Client will have the possibility to download it and access the generation form of said Model Document, via their Personal Area.

All Model Documents have been developed and updated by legal professionals competent in the relevant areas of intervention.

The Client is solely responsible for the answers given to the questions. If the Client chooses to ignore the modeling steps without answering the questions, the selections are made by default by the software, and it is possible that the Model Document does not correspond to the situation desired by the Client.

Regarding ACRE (*Aide à la création ou à la reprise d'une entreprise*) applications, Qonto's intervention is strictly limited to the automatic entry of data completed by the Client. Qonto does not provide advice on eligibility or guarantee the success of the application. The Client expressly acknowledges that it is their responsibility, in particular, to ensure their eligibility for the scheme and to respect the legal deadlines for submitting their application to the relevant service.

downloaded or made available are created by the Client themselves, without the intervention of a lawyer or competent third-party professional or any consultation with a lawyer; and

### **Electronic signature of Model Documents**

Qonto has set up an electronic signature module for Model Documents in partnership with a third-party company holding all the necessary authorizations from the competent authorities.

The conditions of use of this electronic signature solution are therefore applicable to the said electronic signature. Qonto may not be held liable by the Client or his assigns for any loss or damage suffered as a result of the use of the electronic signature module.

When the Client uses this solution, it will enable him to connect to an online platform from which each of the persons (natural or legal) required to sign the Model Documents will connect securely after duly identifying themselves. By logging in, this person accesses all the Model Documents to be signed. In order to sign the Model Document, the user must enter his or her first and last name, and sign electronically. At the end of the electronic signature process, each signatory will receive an electronic certificate containing the signatory's identification, the date and time of signature and the serial number.

The Client is responsible for compliance with the present clauses by all persons (natural or legal) who are required to sign or who have signed one or more Model Documents.

The Client acknowledges and accepts, both in its own name and in the name and on behalf of persons (natural or legal) having signed a Model Document through this intermediary, that the said Model Document signed electronically has the same evidential value as a written document on paper, in accordance with article 1366 of the French Civil Code.
